

# Week Five: Project Sketch

Andrew Walker Journal Submission 2/13/2025

I may or may not change the site of my project. It is currently a plain hill from the point cloud file, it might be nice to have a scene with more dramatic effect. My plan for the project moving forward is to build an outdoor pool/pavilion with arches made of stone. I am thinking it will be for couples that want to relax and enjoy some leisure time in an elevated pool. It might even be cool to have a Byzantine style aqueduct bring water to the pool from a higher hill. I am also picturing some terraced retaining walls around the site.
