Went over line grafting in grasshopper for creating a custom facade

For my ladybug project I followed the video that was uploaded to try and get a better understanding of how it works. Based on my current skill level for rhino and grasshopper, I did not have much knowledge to be able to experiment on my own. I am currently dealing with an issue where my direct sun hours box is not receiving any data collected from vectors. I am currently trying to troubleshoot the issue and correct my script. I have included screenshots on the following page.
